

Ques 1 :- Create custom theme with logo, screenshot & favicon.

Solution:-

step 1: Go to the website >> theme

step 2: create a folder named custom

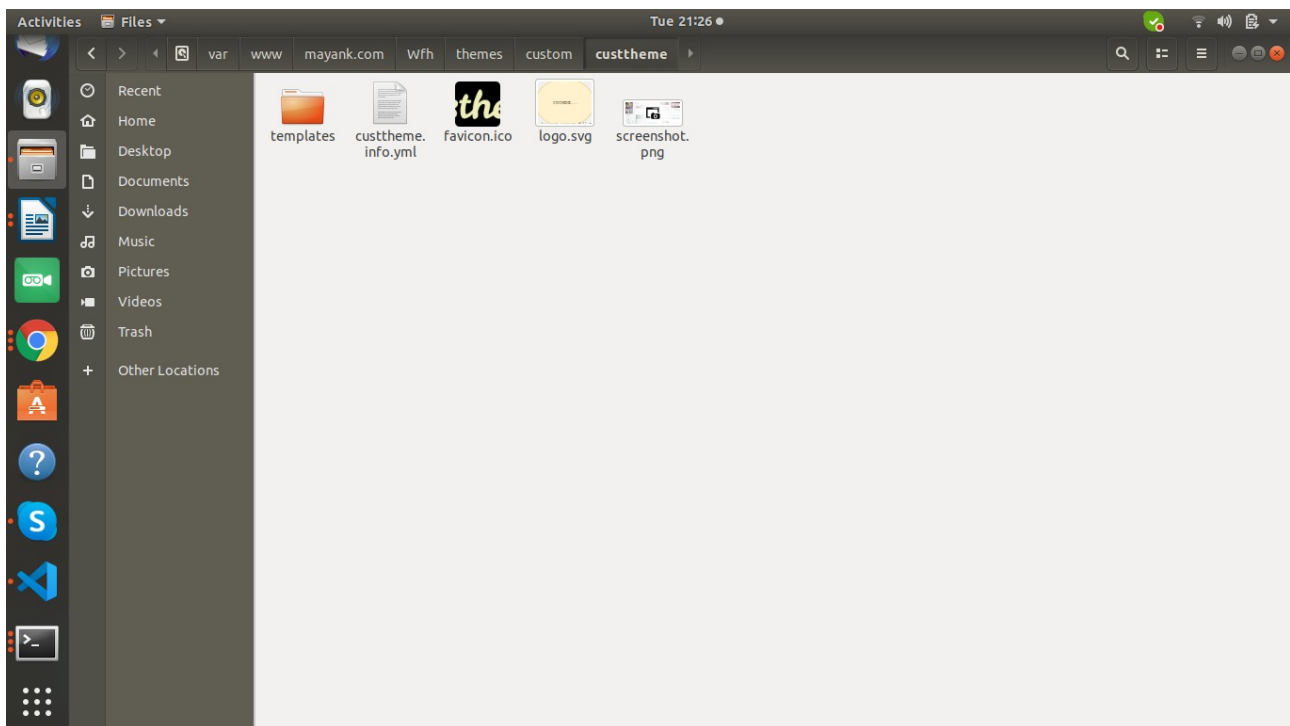

Step 3: create a folder with the name of your theme (Custtheme)

step 4 : create a info.yml file (custtheme.info.yml)

step 5: Add the following code to info.yml file

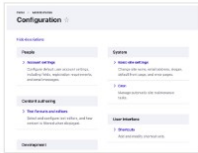

```
name: custtheme
type: theme
core: 8.x
description: my custom theme (work from Home)
base theme: false
```

step 6 : Add logo.svg (Your logo for website), Screenshot.png file (to show a screenshot with theme) , favicon.ico(the favicon image for website)

Step 7 : Go to your website >> Appearance , you can see your theme

Uninstalled themes

Claro 8.8.4 (experimental theme)
A clean, accessible, and powerful Drupal administration theme.

[Install](#) | [Install and set as default](#)

custtheme
work from home custom theme

[Install](#) | [Install and set as default](#)

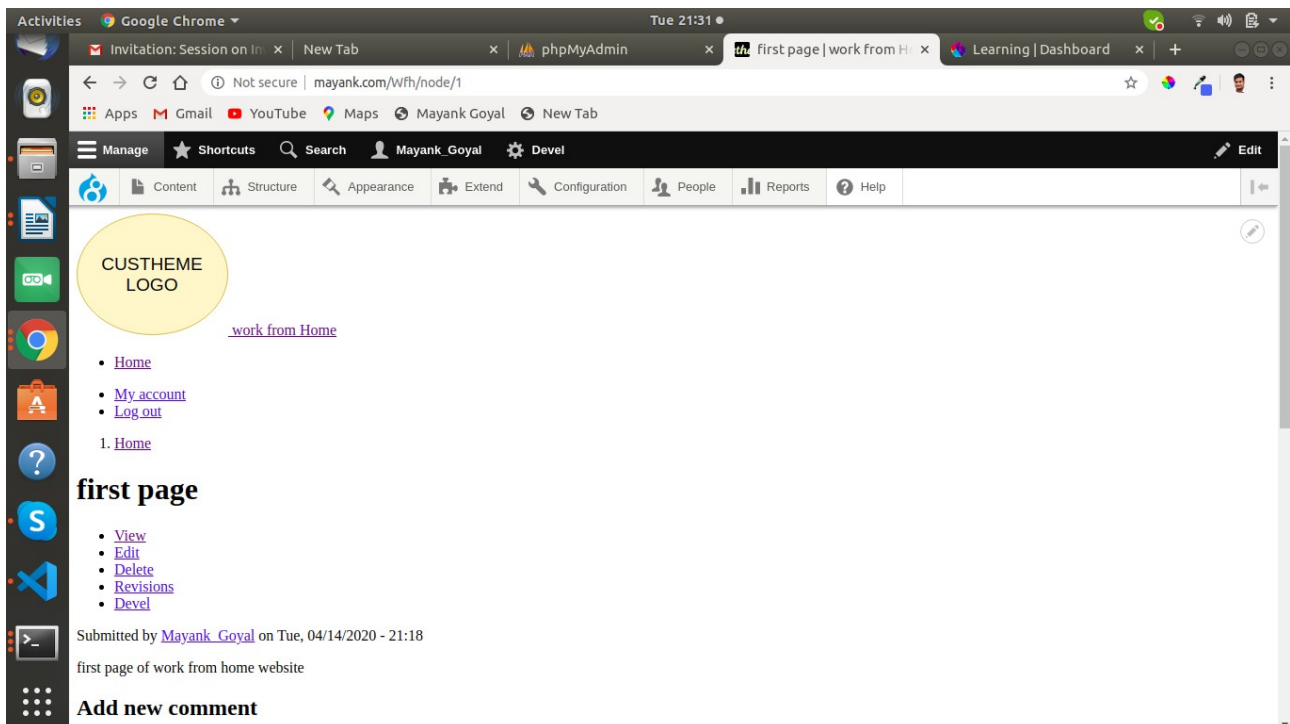

Stark 8.8.4

An intentionally plain theme with no styling to demonstrate default Drupal's HTML and CSS. Learn how to build a custom theme from Stark in the [Theming Guide](#).

[Install](#) | [Install and set as default](#)

step 8: Install the theme and set to default

Ques 2 : Create a new region and place title block in that region.

Soln :

step1 : In custtheme .info.yml file add the following code:

name: custtheme

type: theme

core: 8.x

description: work from home custom theme

base-theme: false

regions:

header: 'Header'

Top : 'Top'

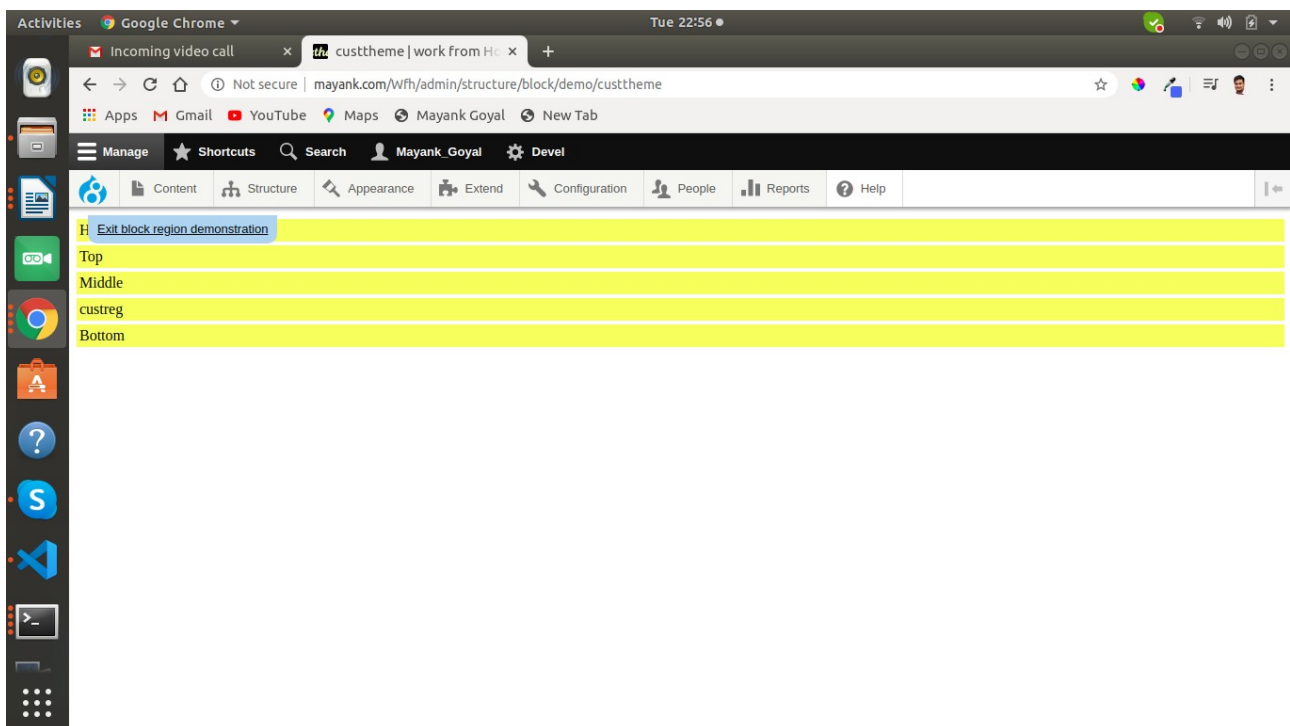

Bottom : 'Bottom'

Middle : 'Middle'
custreg : 'custreg'

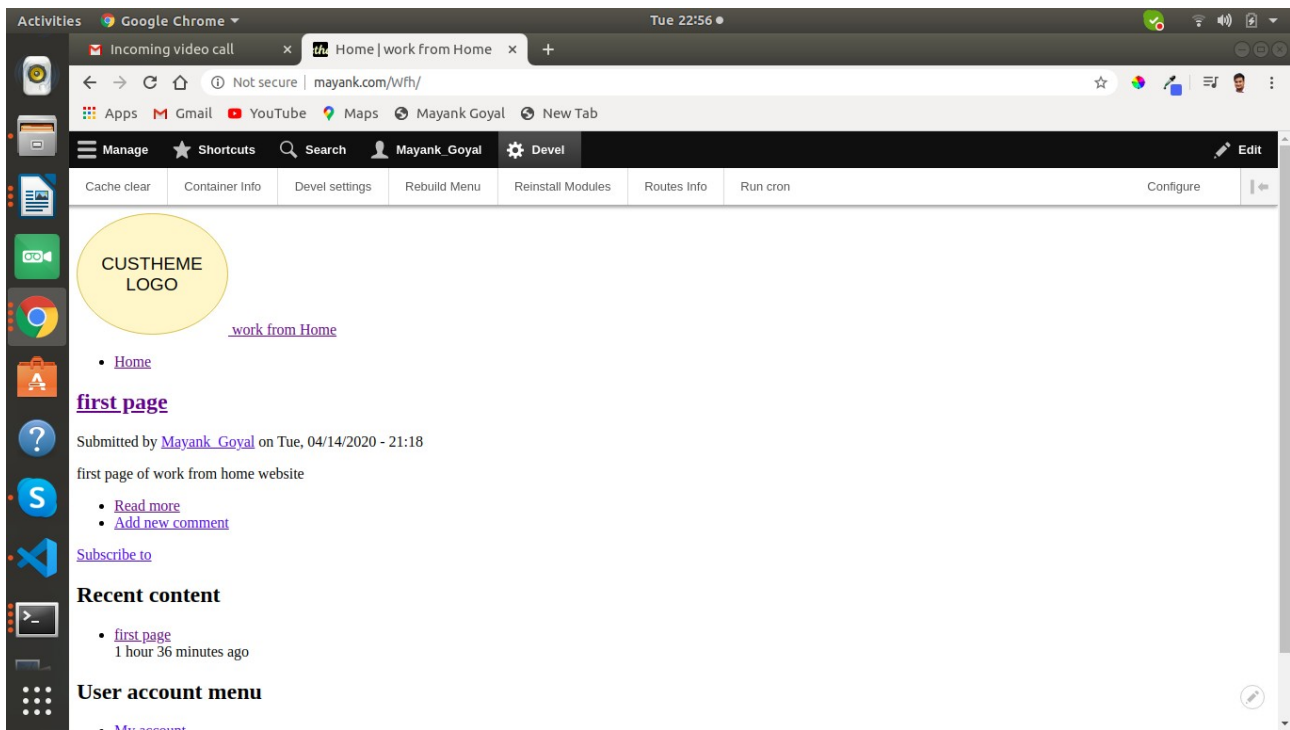

step 2 : go to templates folder and create page.html.twig and add the following code :

```
<div class = "main-page">
<header role = "banner">
{{page.header}}
</header>
{% if page.Top %}
<header role="main">
{{page.Top}}
</header>
{% endif %}
<main role = "main">
<div class="main-page">
{{page.Middle}}
</div>
<div class="main-page">
{{page.custreg}}
</div>
<footer role="main-page">
{{page.Bottom}}
</footer>
</div>
```

step 3 : now go to website , clear the cache and you can see the regions created

step 4: Now place the blocks in the desired regions you want

Ques 3 Add custom.css in css folder and attach it into theme.

Soln :

step 1 create a file name custtheme.libraries.yml and add the following code :

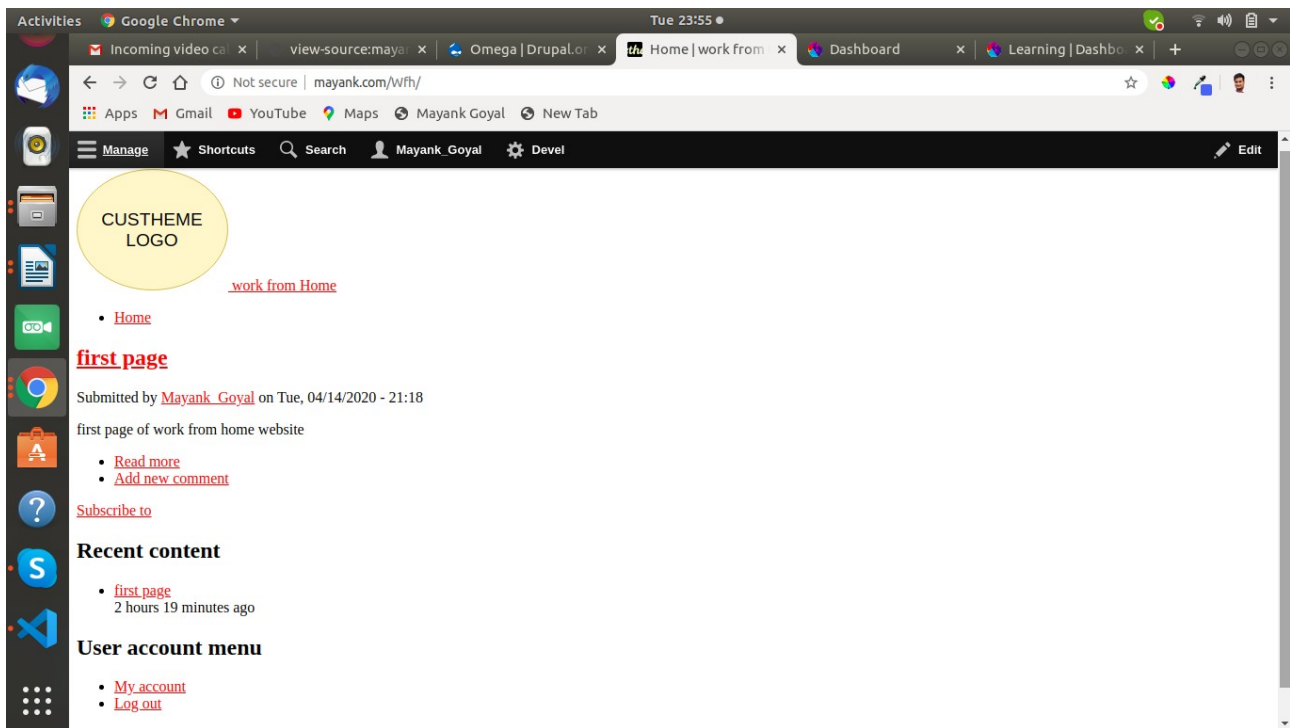

```
my-style:
version : VERSION
css:
component:
css/component/custtheme.css: {}
```

Step 2 : in root directory create a folder named css with subfolder component

step 3 : in component create a file named custtheme.css and add the following code:

```
a{
color: red;
}
```

step 4 : go to website , clear the cache and you can now see the changes

Ques 4 : Add custom.js in js folder and attach it to theme.

Soln :

step 1: add the given code in custtheme.libraries.yml

my-style:

version : VERSION

css:

component:

css/component/custtheme.css: {}

js:

js/custtheme.js: {}

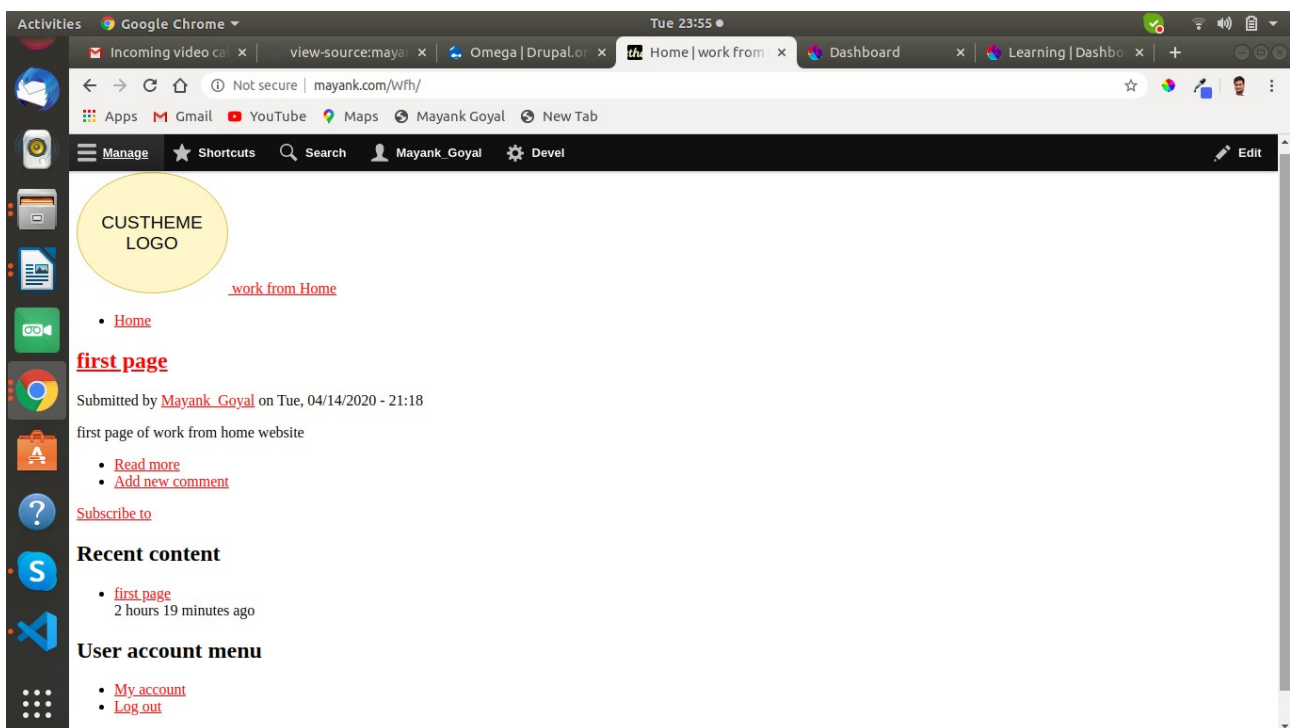

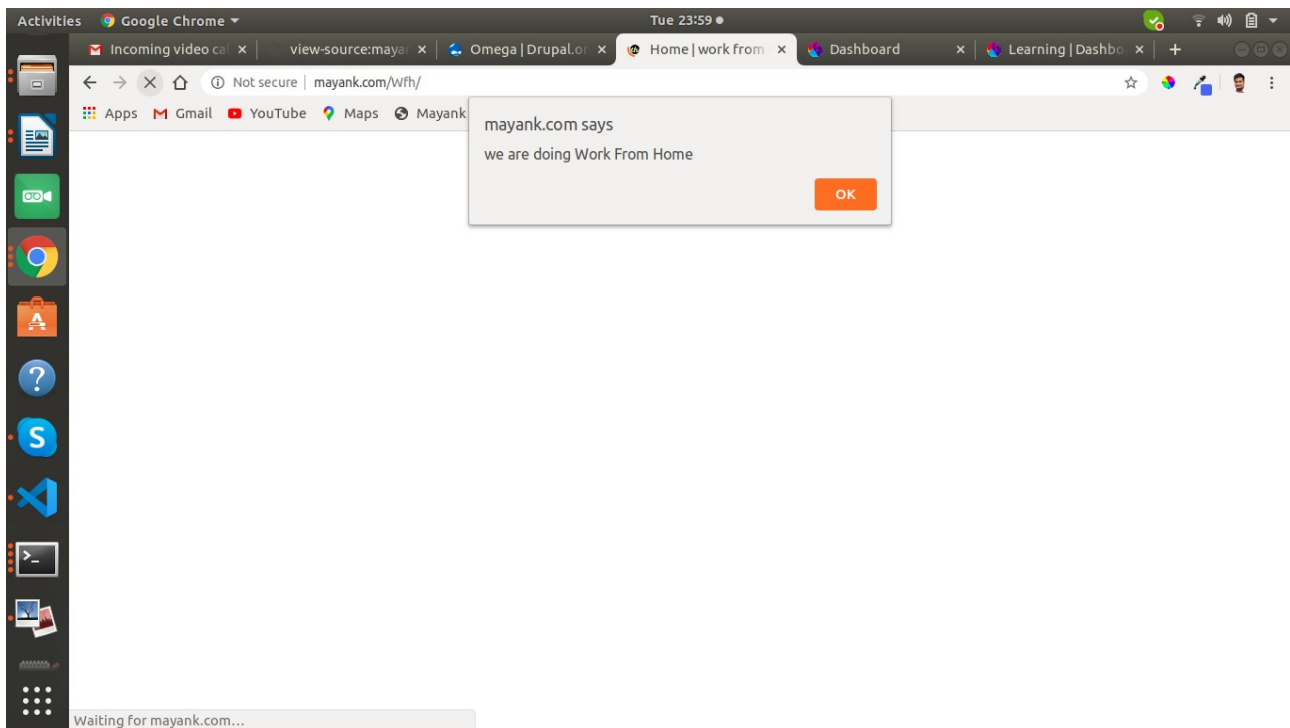

step 2 : Go to root directory create a folder with name js containing custtheme.js file

Step 3 : in custtheme.js file add the following code :

```
console.log("Welcome");
```

```
alert("we are doing Work From Home");
```

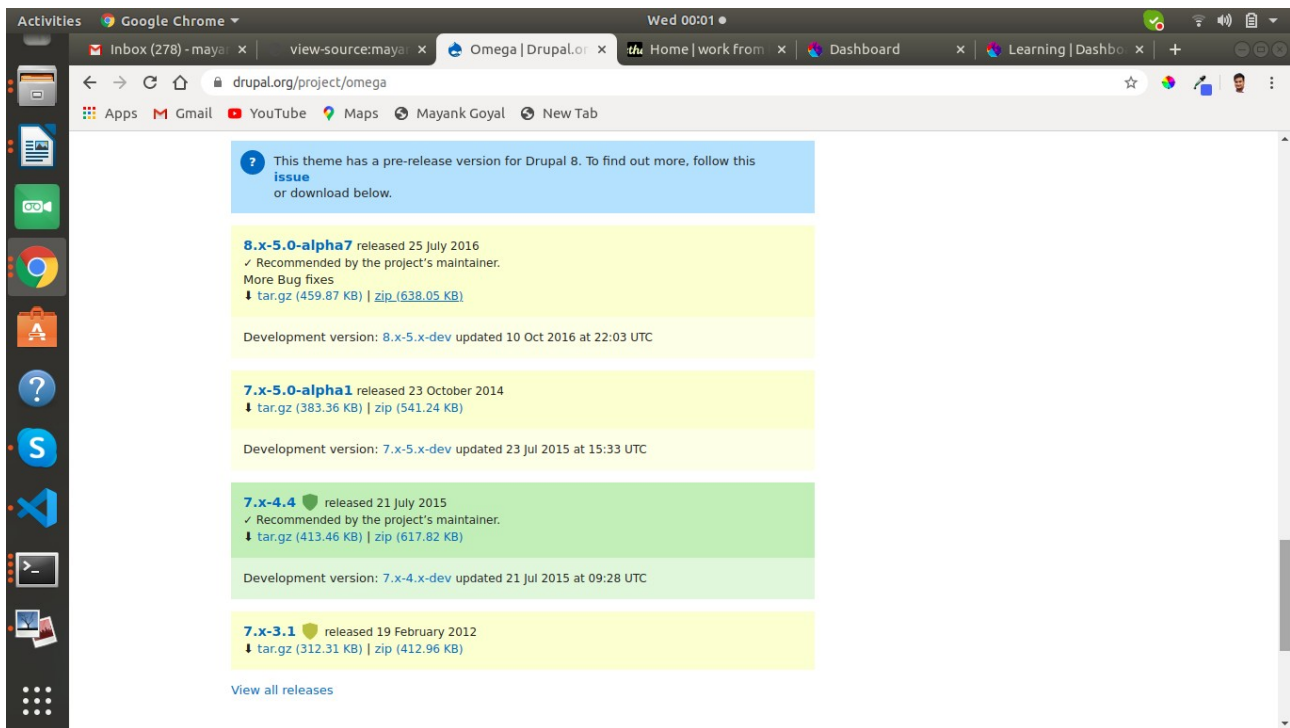

step 4: now go to site , clear cache and reload homepage

Ques 5 : Create An Omega Subtheme

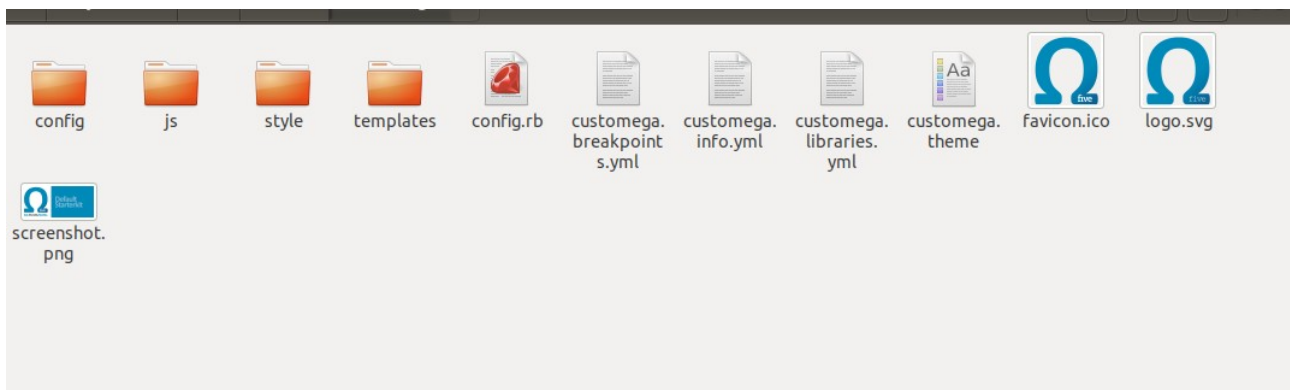

Soln

step1 : Goto drupal.org/project/omega and download omega theme

Step 2: after downloading themes copy the folder in themes , section , choose a version , rename it with desired name (customega)

step 3: open customega and rename all the files with .yml and themes extension with your foldername

Step 4 : Go to your website , clear the cache and install the theme
