

Assignment – 2 Drupal

Q1. .Install fresh drupal with virtual host "local.[YOUR-NAME]recipies.com" (e.g local.amanrecipies.com)

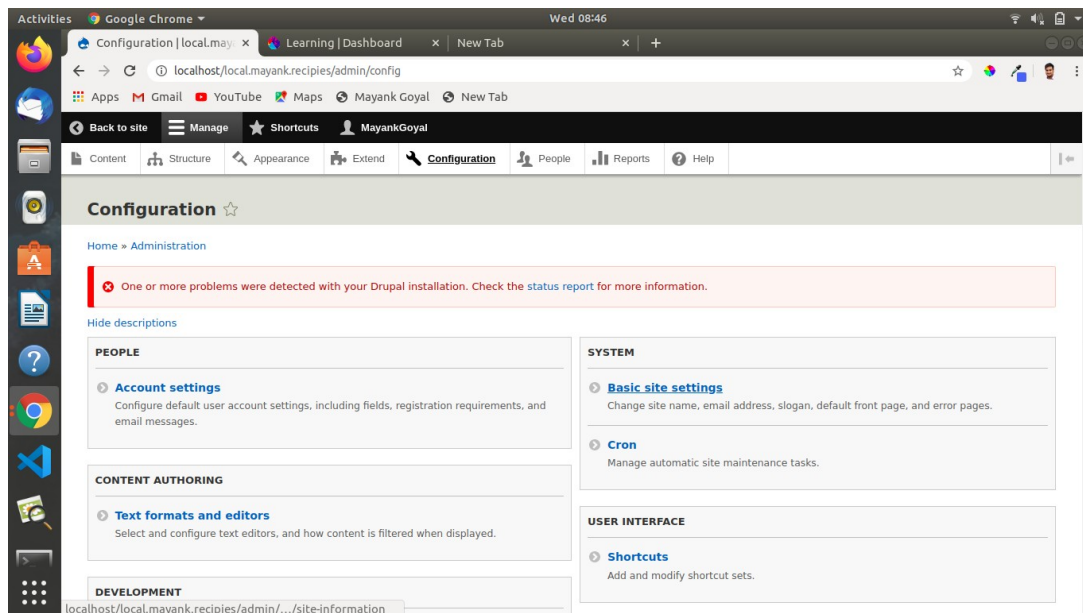

soln:-

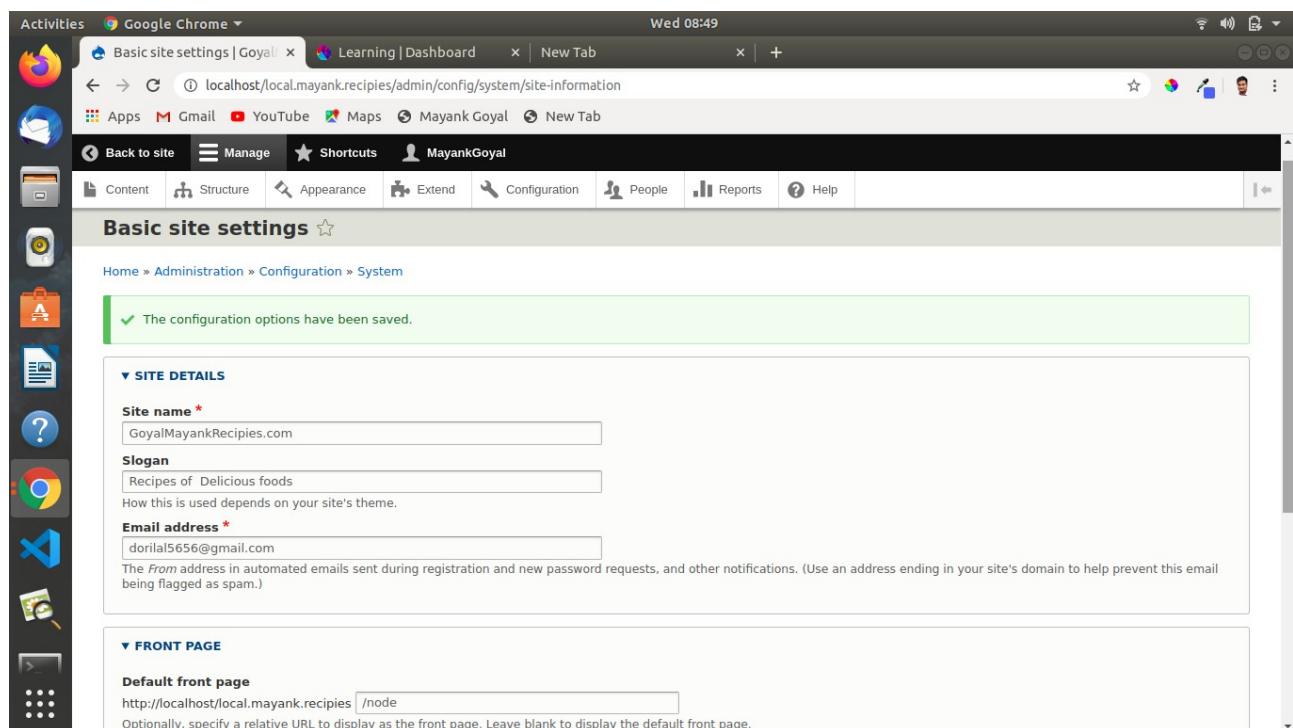

Q2:- Upload a new logo for the site and update site-name.

Soln:-

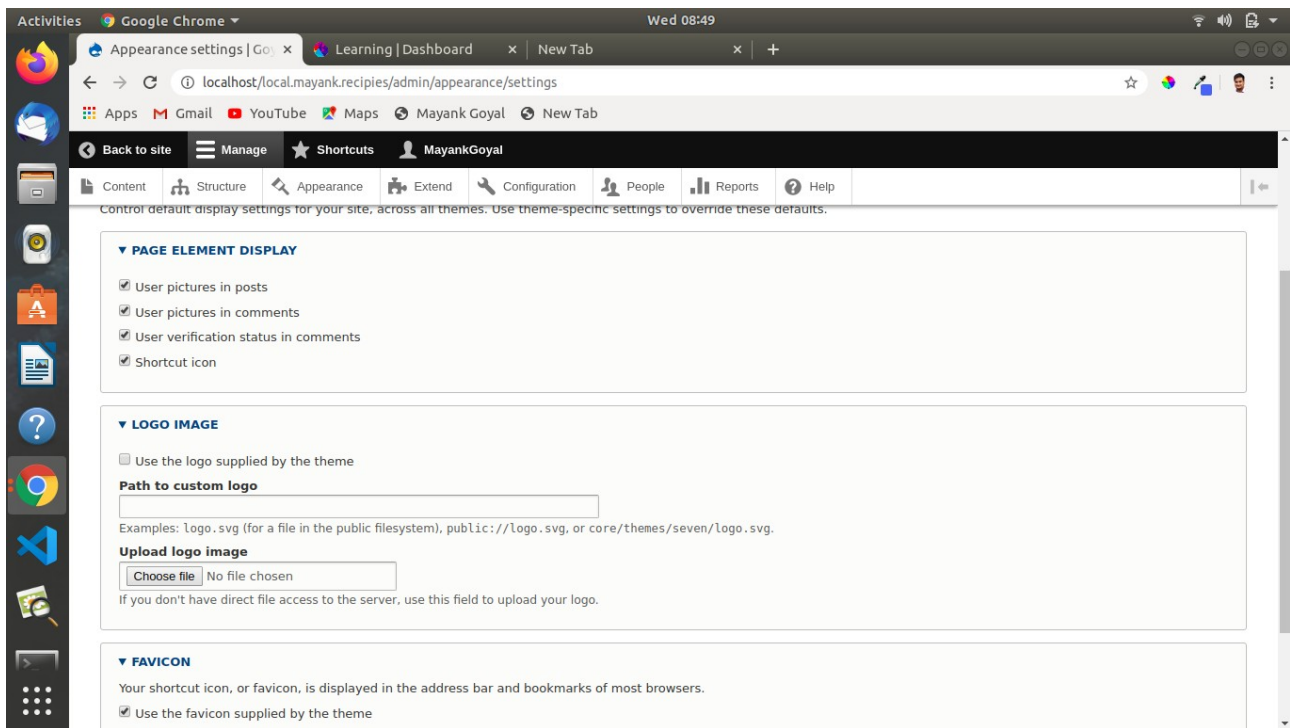

step1:- go to configuration and click basic site settings

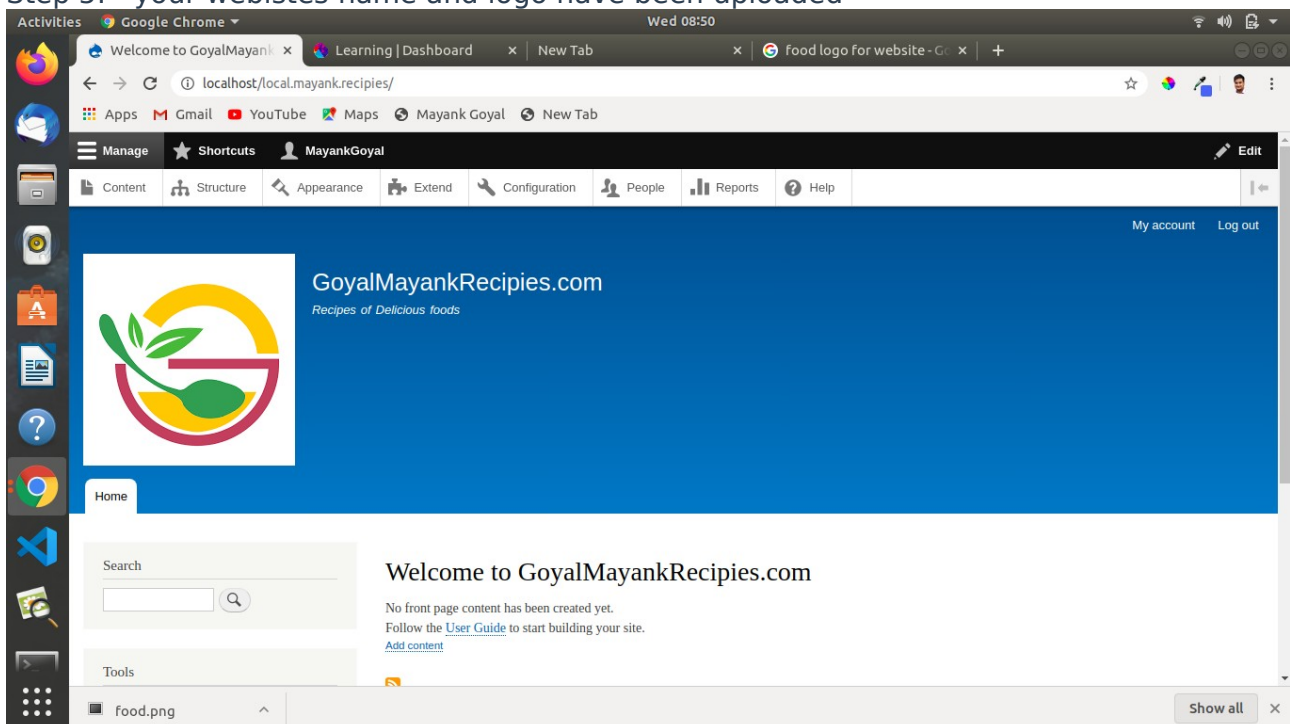

step 2:- change the website name and click save

step 3:- go to apperance settings and upload the new logo in logo image section

Step 5:- your websites name and logo have been uploaded

Ques 3:- .Create two vocabularies :

- a.Ingredient (pasta/noodles etc)
- b.Cuisine (italian/chinese etc)

soln:-

step1 :- Go to structure and choose Taxonomy

step2 :- click on add vocabularies and create vocabulary Cuisine

The screenshot shows the Drupal administration interface in Google Chrome. The browser address bar displays the URL: `localhost/local.mayank.recipies/admin/structure/taxonomy/add`. The page title is "Add vocabulary". The breadcrumb trail is "Home » Administration » Structure » Taxonomy". The form contains the following fields:

- Name ***: A text input field containing "Cuisine". To its right, it says "Machine name: cuisine [Edit]".
- Description**: A text input field containing "Different types of cuisine".
- Save**: A blue button.

The left sidebar shows the "Structure" menu item. The bottom of the browser shows a taskbar with icons for Firefox, LibreOffice, and other applications.

step 3 :- click on save button and now add the fields (pasta \ Noodles) etc.

The screenshot shows the Drupal administration interface in Google Chrome. The browser address bar displays the URL: `localhost/local.mayank.recipies/admin/structure/taxonomy/manage/cuisine/overview`. The page title is "Cuisine". The breadcrumb trail is "Home » Administration » Structure » Taxonomy » Edit Cuisine". The page contains the following elements:

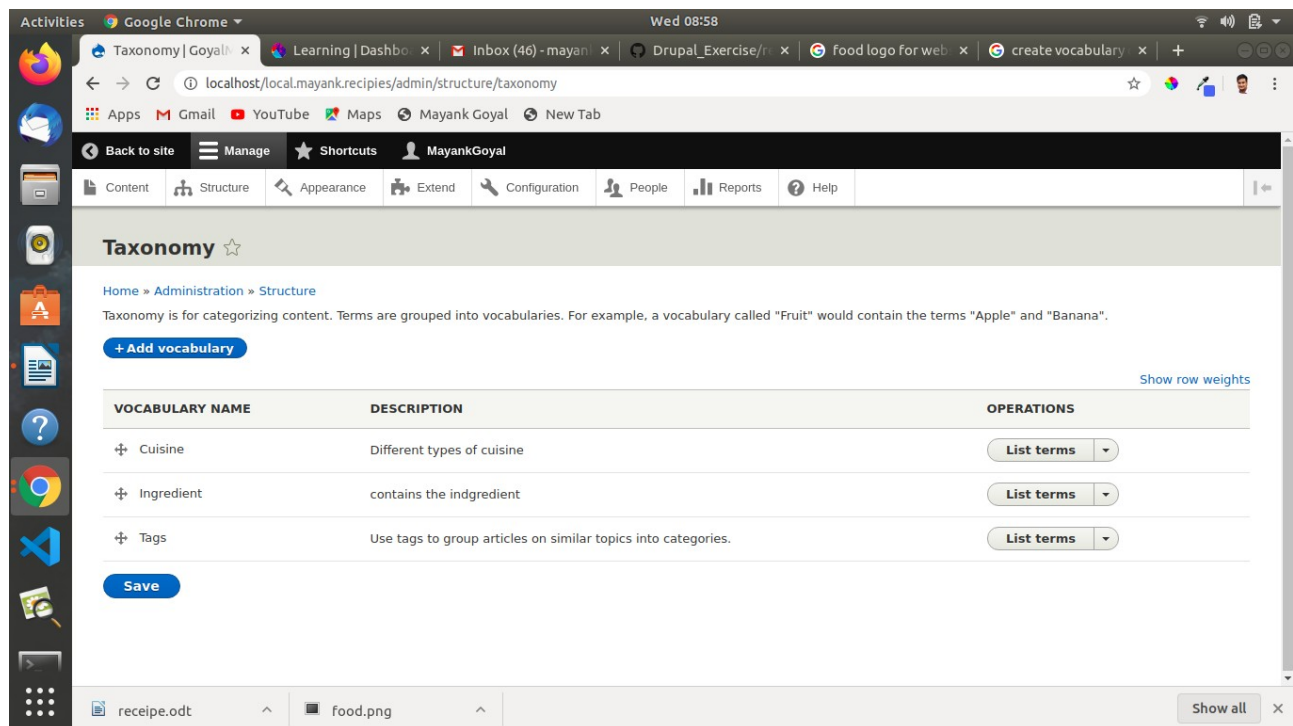

- +Add term**: A blue button.
- Text**: "You can reorganize the terms in *Cuisine* using their drag-and-drop handles, and group terms under a parent term by sliding them under and to the right of the parent." To the right, it says "Hide row weights".
- Table**: A table with three columns: NAME, OPERATIONS, and WEIGHT.

NAME	OPERATIONS	WEIGHT
Indian	Edit	0
Italian	Edit	0
Thai	Edit	0

At the bottom of the table, there are two buttons: "Save" and "Reset to alphabetical".

Step 4:- Now repeat the same steps from step 1 to 3 to create a new vocabulary indrigredient

Result :- both the vocabularies are created

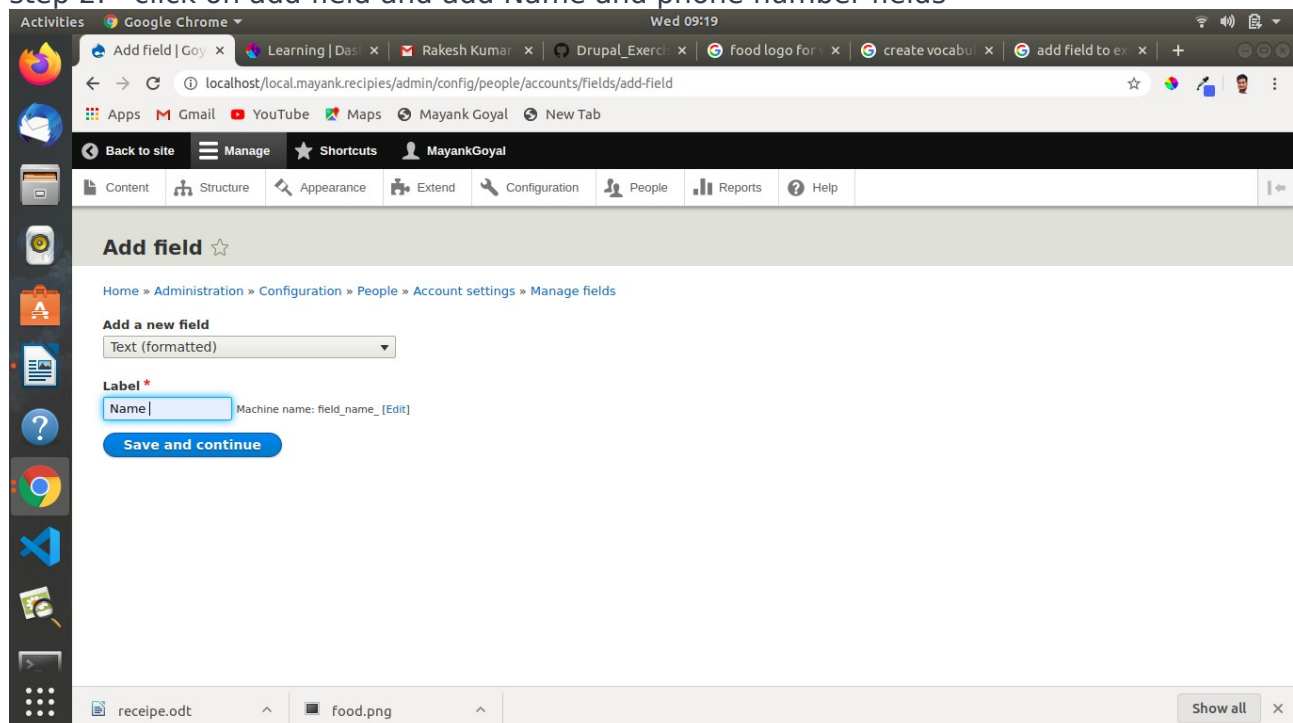

Ques 4 : Add following fields in user account :

- a.Full name
- b.Phone no

soln:-

step 1:- go to configuration>>People>>Account Settings >> Manage fields

step 2:- click on add field and add Name and phone number fields
